**Abstract** - Ragging is a time period used for so-called "circumcision rituals" carried out in establishments of higher gaining knowledge of in South Asian countries, such as India, Bangladesh and Sri Lanka. The practice is comparable to that in North America, bizutage in France, praxe in Portugal and other similar practices in educational establishments around the world. Rape includes harassment, humiliation or harassment of newcomers or younger college students via older students. It regularly takes the structure of serious misconduct in which the freshmen can also go through psychological or physical harm. In 2009 the University Grants Commission of India enacted laws at Indian universities to help prevent robbery, and added a free anti-sterling useful resource line.

The user is supplied with 4 selections like an computerized alert system, emergency contacts, and a method to publish their complaint and to view the reputation of their in the past posted complaints. When a consumer is experiencing ragging in the university campus and he/she requires on the spot help from the college management, the person desires to open the Ragging criticism gadget app, swap on the automatic alert gadget facility and then shake his/her cellular telephone which sends a message routinely announcing RAGGING COMPLAINT DETECTED to the admin cell variety with the aid of default. The person is also given provision to grievance directly to the greater officers of the university like the principal, the vice main and the dean of student services. Their contact numbers are listed one by one and the user wants to select the individual to whom he/she desires to complain about the incident.

**Key Words:** Automatic alert system, Emergency contacts, Post their complaint, View status of complaint.

## 1. INTRODUCTION

Ragging has been killing many harmless people and jobs for a long time. But there has never been a single civil society motion towards the evils of fraud. There have been websites and online groups, where some trustworthy young human

beings gave delivery to a non-profit organization, later renamed the "No Ragging Foundation". Later, the No Ragging Foundation was registered as the Society against Violence in Education (SAVE). Amit Sahai Gangwar, a first-year pupil at NIT-Jalandhar misplaced his lifestyles in October 2005. The news was leaked to a number media stores - news outlets and newspapers. The match was once a foremost thing in the formation of this organization.

The Society Against Violence in Education (SAVE) is a non-partisan, non-profit, non-profit organization whose one-of-a-kind mission is to shield the lives and dignity of students in educational establishments and to provide victims of 'fraud' help and to facilitate the eradication of fraud in educational institutions through awareness, advocacy, lookup and more. such methods. It works to create an environment where students can study with pleasure and not with fear. It directs its efforts to give up the violence and harassment of innocent humans whilst promoting peace and harmony between excessive and low college students in educational institutions.[5][6]

Create a strong public authority in opposition to fraud. Different device but healthy and personalized methods of interacting between adults and children. Join the character protests against rape underneath the umbrella of a strong, united organization. Involve authorities, skills, students and others on anti-ragging drives.[3][4]

## 2. LITERATURE REVIEW

In colleges ragging is the unlawful activity via the senior students, there are many instances inflicting by ragging in India. The infrastructure serves as a common platform for the everyday public to engage and exchange statistics about crook things to do persons. There is a ragging takes place in any instructional institutions no purposes to submit a complaint. For anti-ragging different committee is need to monitoring their everyday activities. All Kind of documents preserve manually. [1][2]

### 2.1 Disadvantages

- There is not a proper system to visualize.
- Criminal activities may raise.

### 3. PROPOSED SYSTEM

The new app will work only on Android machine and will facilitate college students to register a criticism in opposition to ragging immediately. Students would be required to log in, after which they would be capable to register their complaints [5][6]. The grievance will then be dispatched to the worried authorities for well-timed action and the motion will be initiated immediately. Previous archives reveal that well timed action was once taken in every case, which in flip resulted in a fall in such cases [9][10]. Now, with the launch of the app, the Ministry hopes to wipe out the exercise completely. The proposed architecture illustrated in Fig.3.1.

#### 3.1 Advantages

- Undertaking demonstrated through each student and his/her mother and father or guardians, which will then be stored electronically and will comprise the important points of every student.
- Record of registered complaints received and the status of the action taken.

### SYSTEM DESIGN

#### 3.2 Input Design

The input sketch is the hyperlink between the information system and the user. It contains the growing specification and techniques for facts practice and these steps are vital to put transaction information in to a usable form for processing can be carried out by using inspecting the laptop to study data from a written or printed record or it can occur by using having people keying the information immediately into the system. The sketch of input focuses on controlling the quantity of input required, controlling the errors, heading off delay, fending off extra steps and preserving the method simple. The input is designed in such a way so that it affords security and ease of use with conserving the privacy. Input Design regarded the following matters [7][8].

- ✓ What facts be given as input?
- ✓ How the records should be arranged or coded?
- ✓ The dialog to information the working personnel in presenting input.
- ✓ Methods for getting ready enter validations and steps to comply with when errors occur.

#### 3.3. Objectives

Input Design is the manner of converting a user-oriented description of the enter into a computer-based system. This plan is important to keep away from blunders in the facts input procedure and show the right course to the management for getting correct data from the computerized system.

It is done by using growing uncomplicated displays for the records entry to manage giant quantity of data. The goal of designing input is to make information entry less complicated and to be free from errors. The information entry display is designed in such a way that all the records manipulate can be performed. It additionally provides file viewing facilities.

When the statistics is entered it will take a look at for its validity. Data can be entered with the help of screens. Appropriate messages are provided as when wished so that the user will not be in maize of instant. Thus, the objective of input layout is to create an input design that is handy to follow [7][8].

### 3.4 Output Design

A exceptional output is one, which meets the necessities of the end consumer and provides the information clearly. In any gadget outcomes of processing are communicated to the customers and to other gadget thru outputs. In output sketch it is determined how the facts is to be displaced for instant want and additionally the hard copy output. It is the most vital and direct supply facts to the user. Efficient and shrewd output design improves the system’s relationship to help consumer decision-making [15].

Designing computer output ought to proceed in an organized, properly concept out manner; the right output needs to be developed while making sure that every output component is designed so that human beings will discover the device can use without problems and effectively. When evaluation sketch laptop output, they have to Identify the unique output that is wanted to meet the requirements [13][14].

Select techniques for supplying information.

Create document, report, or other codecs that contain records produced with the aid of the system.

The output shape of a records machine has to accomplish one or greater of the following objectives.

- o Convey records about previous activities, present day status or projections of the Future.
- o Signal essential events, opportunities, problems, or warnings.
- o Trigger an action.
- o Confirm an action.

### 4. MODULES

#### User Module: -

Main module in the app is user module, once the person can register with the machine then he/she will get the get entry to in the app. after login done if the any ragging is happened then without delay update the details. Every other flexibility is additionally on hand right here to contact the emergency wide variety also provided.

#### Collage Admin: -

College admin can operate the action on the failed complaints; complaints can be considered via the admin and can take the perfect action on the complaint.

#### Add Complaint Module: -

In this module, Users can a make complaint against ragging. In this, those who are filling complaint as to fill some fields like Accused Name, Ragging Type, Mobile Number etc...

#### View Complaint Module: -

In this module, admin can view the complaints made by students.

### 5. SCREENSHOTS

After executing the above proposed system, we got the following results

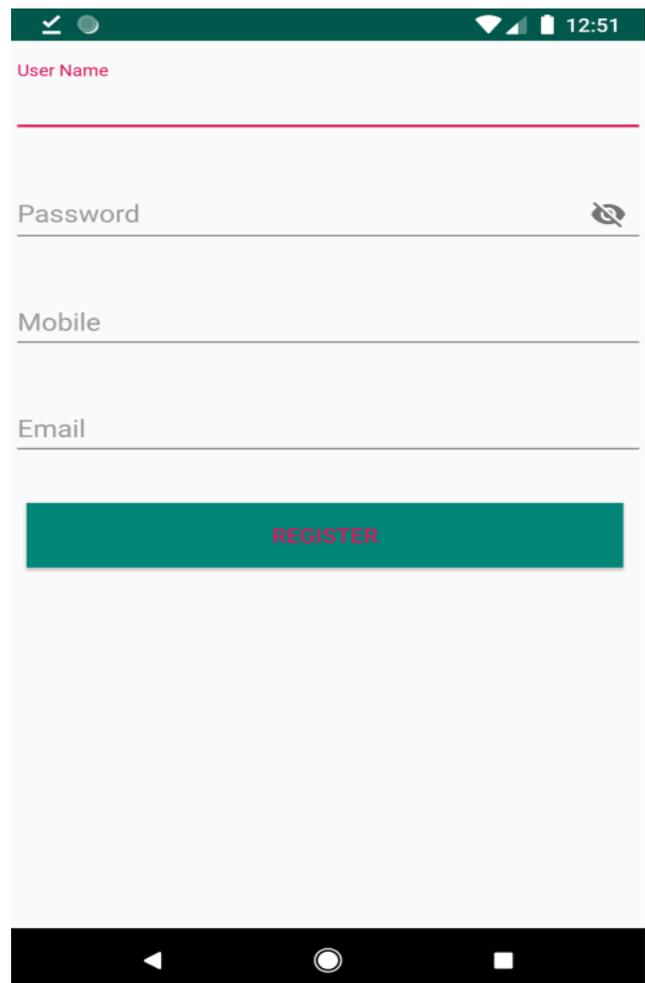

Fig 5.2: View Complaints

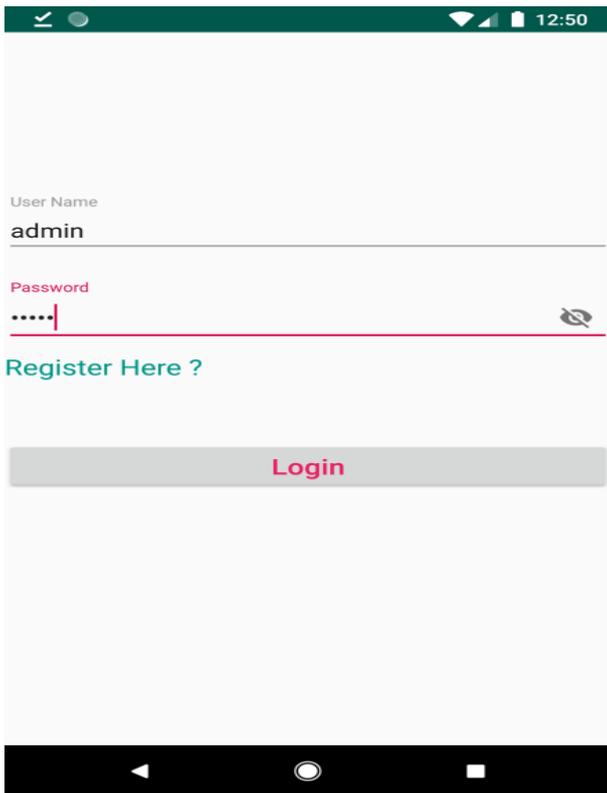

Fig 5.3: Admin Login

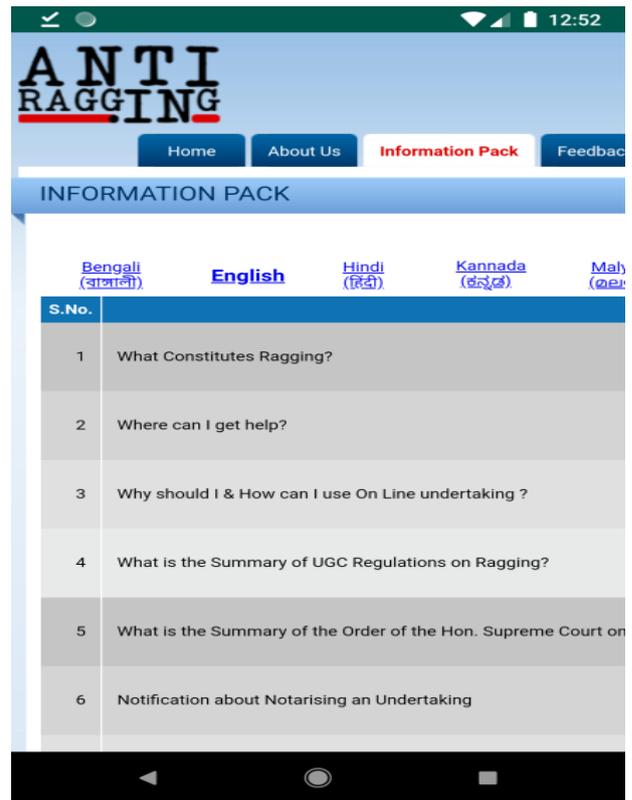

Fig 5.5: Help Desk

Fig 5.4: Splash

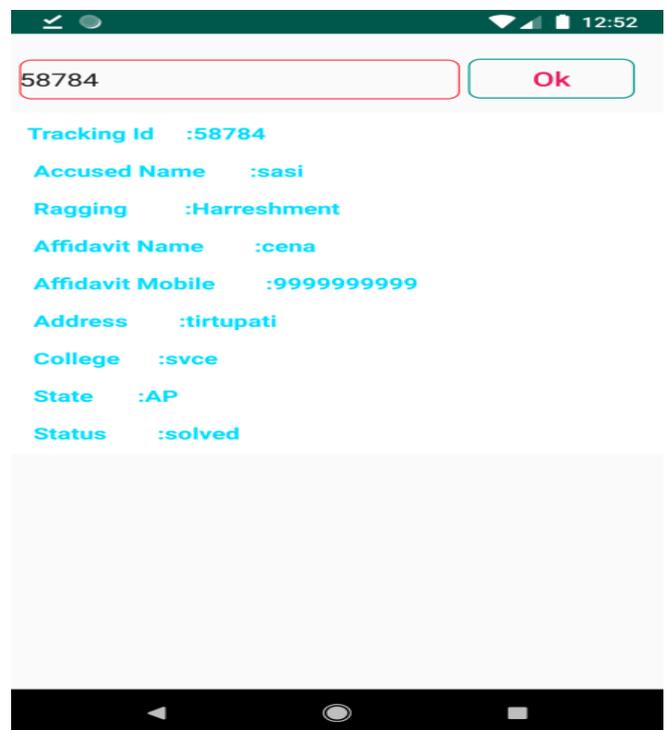

Fig 5.6: Complaint Tracking

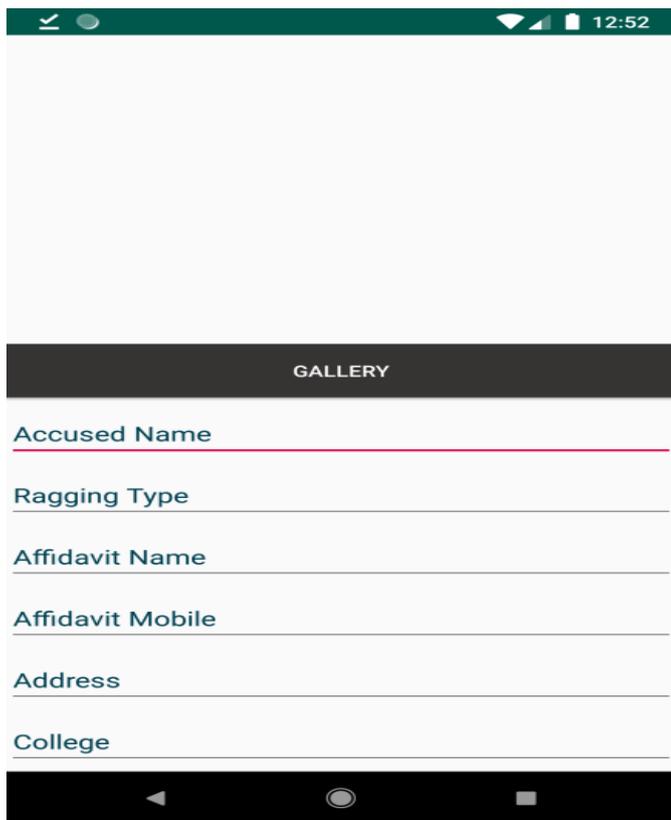

Fig 5.7: Add Complaint

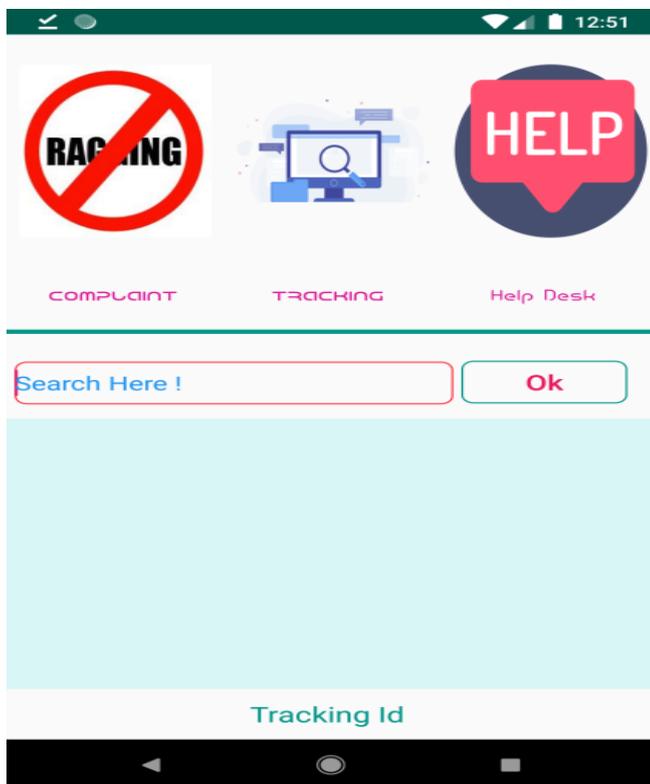

Fig 5.8: User Home

## 6. CONCLUSION

As the instability worsens every year, there is an automated anti-rape employer in India. A range of voluntary groups have sprung up, walking public attention campaigns and organizing guide for victims. The user is additionally given provision to grievance without delay to the higher officials of the college like the principal, the vice principal and the dean of student services. Their contact numbers are listed one by one and the person needs to pick out the individual to whom he/she wishes to complain about the incident. Again, an computerized message saying ragging detected will be dispatched to the man or woman chosen with the aid of the user.
